

NATURAL REPELLENT ESSENCE A GENTLE BARRIER AGAINST PEST ANIMALS

AN ESSENCE THAT RESPECTS
THE ENVIRONMENT

EFFECTIVELY REPELS
UNWANTED GUESTS

A delicate natural essence that keeps rats, rodents and pest birds away without harming them. Formulated with natural ingredients, it offers safe and eco-friendly protection.

MADE IN ITALY

BENEFITS

Natural Effectiveness

Made with plant-based essential oils, it works as a repellent for mice, rats, and birds in a completely natural way.

Safe for people and pets

Contains no toxic substances: harmless to the health of adults, children, and pets.

Environmentally friendly

Eco-friendly formula that does not pollute and does not alter the balance of the ecosystem.

Non-lethal action

Repels rodents and birds without killing them, promoting an ethical and sustainable approach to space protection.

Easy to use

Ready to use: just open the STOPTOP bottle in critical areas to create an olfactory barrier. No complicated installations or special maintenance required.

Versatile

Effective in domestic environments, garages, basements, gardens and anywhere you want to keep rodents and birds away.

STOPTOP is a natural essence that acts by creating an unpleasant olfactory barrier for rodents and birds, preventing them from settling in treated areas.

STOPTOP is a product with guaranteed and proven effectiveness, with over 3 years of use by major international companies.

Thanks to the special STOPTOP blend, these animals perceive an intense and unpleasant smell, choosing to move away without suffering harm.

Repellent Essence

We use plant-based fragrances, highly effective in keeping mice, rats, and birds away in a completely natural way.

Gentle

The goal is not to kill, but to repel ethically. Animals detect the strong scent and move elsewhere, leaving your spaces free from infestations.

Active protection for two months

Once the STOPTOP bottle is opened, the essence gradually releases its active ingredients, offering continuous protection for a certain period. It is recommended to reapply the product as indicated to maintain its effectiveness over time.

Safe and Eco-Friendly

Natural ingredients pose no risk to the health of people, pets, or the environment, ensuring sustainable and safe defense for all.

NATURAL DETERRENT FOR RODENTS AND PEST BIRDS

NEVER AGAIN...

... hygienic and sanitary risks

The presence of rodents or birds can contaminate storage areas, kitchens, and common spaces, creating potential health problems and compromising food safety.

... image and reputation damage

Hospitality or food establishments showing signs of infestation risk losing customers and suffering reputational damage, both locally and online (negative reviews).

... damage to cables or materials

Traditional pest control measures and damage caused by rodents (chewed cables, damaged materials) can result in high and recurring costs.

... regulatory compliance issues

In many sectors (food, hospitality, industrial), strict hygiene and safety regulations apply. Infestations may lead to fines or business suspension.

MAIN USE CASES

STOPTOP has wide application in various settings, offering a safe and effective method to repel rodents and birds.

Thanks to its versatility, it can be used in hospitality facilities, food service establishments, industrial environments, and also at home, ensuring protection and hygiene without resorting to harmful solutions.

Hotels and Hospitality Facilities

- Common areas (lobbies, corridors, dining halls)
- Kitchens and pantries
- Outdoor areas like gardens, terraces, or pools

Restaurants and Bars

- Food preparation and storage areas
- Outdoor spaces like patios, canopies, and waste areas
- Warehouses or cold rooms

Food Industry

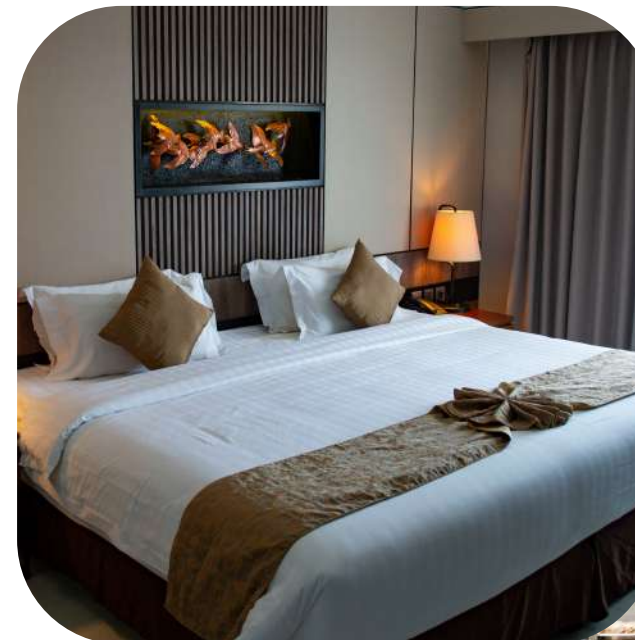

- Production and packaging departments
- Warehouses for raw materials and finished products
- Goods loading/unloading areas

Other Industrial Sectors

- Storage warehouses, logistics areas, and workshops
- Production plants and machine rooms (where cables may be damaged by rodents)
- Outdoor areas often frequented by birds

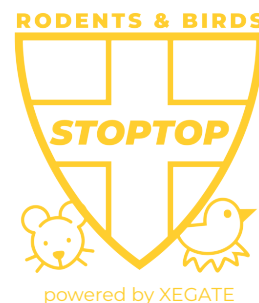

Home Use

- Basements and garages
- Balconies, terraces, and verandas
- Storage areas and infrequently used spaces
